Landscape

- Saving water
- Easy installation
- No mowing, no watering, no fertilizing
- Up to 10 years service life
- All-year-round green

Artificial grass for landscape has become more and more popular especially in areas where water is in short and natural grass is difficult to grow. Artificial grass has developed wide applications including residential landscape (gardening), playground, road verges, roof, hotel/school/institution landscape, pet areas and etc.

Do you realize that artificial grass
can also get

old?

UVA & UVB in the sunlight
can damage your grass!

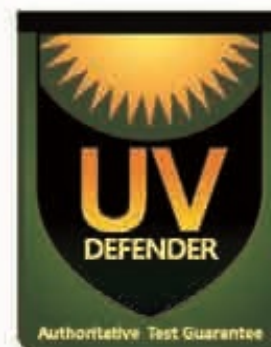

CCGrass keeps green over years

Low quality grass fades easily

The mean radiation distribution of UVA and UVB on the earth differs from time to time, and from place to place. You may come from a low UV radiation place, or you may come from the places where annual sun exposure is higher, such as equatorial zone, sunny latitudes or thin air areas. CCGrass landscape can fulfill all your needs since it has passed both UVA ageing test and UVB ageing test for fierce 3000 hours:

UVA 3000 hours: to simulate 6-7 years in most areas and 5-6 years in extra sunny areas.

UVB 3000 hours (fiercer than UVA): to simulate 7-8 years in most areas and 6-7 years in extra sunny areas.

Is the grass **safe**
enough for your family?

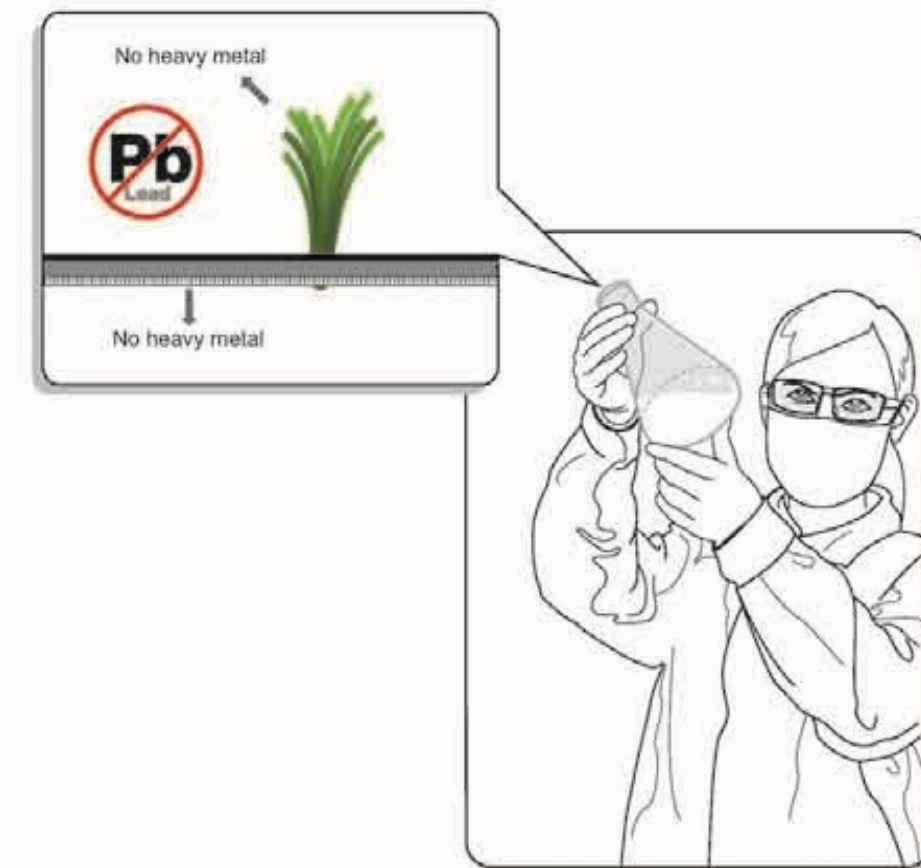

Heavy metal in the grass could
cause health problems.

What's the healthy artificial grass for your family?

Just like the furniture, the floor and the car, artificial grass landscape could become a part of our daily life. Its ecological-safety becomes significant and comes under CCGrass close focus.

Lead is a highly toxic heavy metal which can be emitted into the air, leaving us exposed in the lead contaminated dust. Lead exposure affects the nervous system and can cause a range of health effects. Noticeably, children's growing bodies would absorb more. Lead content in artificial grass landscape should raise much attention.

CCGrass landscape is proved that there is no detectable trace of lead according to California's Prop 65, which is the strictest standard for lead content of the world.

Except for lead, other hazardous elements and heavy metal, such as Cd, Hg and Cr can also cause health problems. CCGrass landscape is free of all these hazardous substances:

TURF + ♻️ landscape has passed the tests:

- No 73 substance of high concern
- No 8 kinds of heavy metal
- Lead free

TURF+ - Quality Guarantee

Product features

test	item	result	descripton
UV	UVA	4~5	no obvious color change
	UVB	4~5	
No harmful Chemical	1,2,3-trichloropropane	No Detective	no 73 substance of high concern
	1,2-Benzenedicarboxylic acid, di-C6-8- branched alkyl esters, C7-rich	No Detective	
	1,2-Benzenedicarboxylic acid, di-C7-11- branched and linear alkyl esters	No Detective	
	1,2-Dichloroethane	No Detective	
	1-methyl-2-pyrrolidone	No Detective	
	2,2'-dichloro-4,4'-methylenedianiline	No Detective	
	2,4-Dinitrotoluene	No Detective	
	-----	-----	
	Cadmium(Cd)	No Detective	
	Lead(Pb)	No Detective	
Heavy metal free	Mercury(Hg)	No Detective	to ensure the addtitive is safe
	Hexavalent Chromium(Cr(VI))	No Detective	
	Sum og PBBS	No Detective	
	Antimony(Sb)	No Detective	
	Arsenic(As)	No Detective	
	Barium(Ba)	No Detective	
	Cadmium(Cd)	No Detective	
	Chromium(Cr)	No Detective	
	Mercury(Hg)	No Detective	
	Selenium(Se)	No Detective	
Flammability	Lead	No Detective	lead free
	Whether flame reaches 150mm	no	non-flammable

UV test
long service life

Heavy metal test
Heavy metal free

Flammability test
Strong anti-flammability

Fine PX2

- The most popular residential landscaping grass in the world
- The combination of green and brown fiber makes natural and rich appearance

Fiber : monofilament & curled monofilament
Profile : rectangular blade
Color : multicolor
Pile height : 30-50cm
Application : garden, playground, office...

Breeze EX2

- Soft touch to deliver breeze-like feel
- Extremely thin fiber to enhance the skin comfort

Fiber : monofilament & curled monofilament
Profile : thinner and softer blade
Color : multicolor
Pile height : 30-50cm
Application : garden, playground, office...

Nature PX2

- Strong monofilament to imitate wide blade natural grass
- Superior UV-stability and longer lifespan

Fiber : monofilament & curled monofilament
Profile : wider olive blade
Color : multicolor
Pile height : 30-50cm
Application : garden, roof, parks, roadsides...

Iris EX2

- Stronger and more resilient fiber with a "spine" running in the blade
- Better "standing up" quality

Fiber : monofilament & curled monofilament
Profile : thinner and spined blade
Color : multicolor
Pile height : 30-50cm
Application : garden, roof, parks, roadsides...

Victoria EX2

- "V" shape monofilament makes a special appearance
- "memory" characteristics to keep the fiber in good shape over time

Fiber : monofilament & curled monofilament
Profile : "V" shape blade
Color : multicolor
Pile height : 30-50cm
Application : garden, roof, parks, roadsides...

Prime SM PX2

- "S" shape monofilament makes a special appearance
- "memory" characteristics to keep the fiber in good shape over time

Fiber : monofilament & curled monofilament
Profile : "S" shape blade
Color : multicolor
Pile height : 30-50cm
Application : garden, roof, parks, roadsides...

Green HF

- Smooth ball roll for golf
- High density for constant use

Fiber : curled monofilament
Color : verde
Pile height : 10, 18, 30 cm
Application : golf, garden, roof, parks, roadsides...

Connie EX2

- Soft feel
- Natural appearance

Fiber : monofilament & curled monofilament
Profile : thinner and spined blade
Color : multicolor
Pile height : 10-30 cm
Application : garden, roof, parks, roadsides...

Fanturf EX2

- Soft feel
- Natural appearance

Fiber : curled monofilament & curled monofilament
Color : multicolor
Pile height : 10-30 cm
Application : garden, roof, parks, roadsides...

GEII

- Strong UV stability
- Short pile

Fiber : fibrillated fiber
Color : verde
Pile height : 08-30 cm
Application : garden, roof, parks, or commercial events...

Now choose the right
 type from **TURF+** 

References

Installing Guide

Remove the weeds

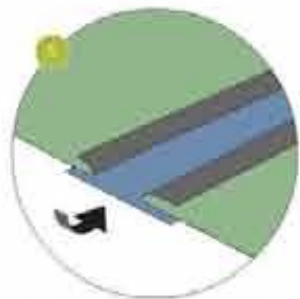

Compact the sub base

Lay out the grass roll

Trim edges

Fold the trimmed edges; put the joint tape below the edges

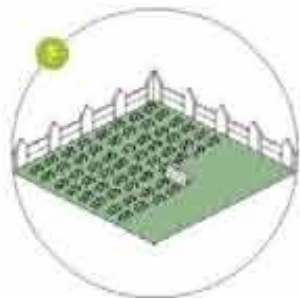

Pour the glue on the joint tape

Let the glue dry naturally; put down the edges

Step on the seaming and edges

Sprinkle and level the quartz sand

Done!

Durable & Safe **TURF+**
